

Budgetary

- Archive year colors will now save correctly.
- Corrected an issue where certain criteria was causing detail report sort order to be incorrect.
- Fixed an issue occurring when running a vendor list for vendors that have a data entry message.

Clerk

- Searching for owners and closing the screen was returning to Cash Receipting instead of remaining in Clerk; this issue has been resolved.
- Corrected an error occurring during import of online dogs. Error was related to matching central parties and has been resolved.

Collections

- Per CoreLogic, changed the email address which the tax service extract is automatically sent. Also added fields in the Customize screen where users can edit/update the CoreLogic emails and add additional ones if desired.
- Fixed a couple of issues causing tax service file to save incorrectly relating to the save path.
- Corrected typo and verbiage on Certificate of Settlement and Recommitment.
- On lien notices; reduced character limit for the tax payer name on Mortgage Holder and Interested Party copies to correct wrapping issue.
- Fixed an error occurring in reminders when using the "Past Due Only" option.
- Fixed errors causing the lien date chart from displaying.
- Corrected a specific issue being caused by searching by map/lot repetitively.

Motor Vehicle

- Fixed an issue causing the inability to void excise only transactions.
- Fixed a problem with voids not returning plates to inventory.
- Updated Residence codes which will update when a "Check Database Structure" is run.
- Prorated MC registrations that are transferred will now use the full rate to determine prorated fees instead of the previously prorated rate.
- Corrected an issue with class code printing for excise only transactions that were not an AP class.
- Corrected an issue during the BMV update that was causing records to save incorrectly in the database which was in turn causing a problem in the period close out process.
- Sticker fields are now disabled on excise only transactions.
- Updated the validation during a void to ensure the MVR3 entered is the one voided.
- Added a warning on transfers when adding a vehicle to a fleet that a registration cannot both prorate and take credits as a transfer, except in the case of Motorcycles.

Motor Vehicle

- Corrected sticker issues during voids. Only inventory issued with the selected transaction (MVR) will be voided.
- Transfers during a renewal will now give an error if the expiration is more than 6 months away.
- Added error checking during registration processes to prevent save issues.
- End of period reports will no longer include the Dealer Sales Tax transactions in the No Fee count. Also, the reports will show the Sales Tax Exempt transactions in the No Fee count if the Use Tax Form was not done on the system.
- Auto posted Rapid Renewal Journals created in succession will no longer create multiple control entries.
- Corrected state report subcategory label for Special Mobile Equipment.
- Corrected screen resolution issues with the additional information box so it will properly appear.
- Central Party names will now be in all caps when pulling over to a Motor Vehicle Registration. Also corrected a couple of label issues on the state reports relating to Tractor/SME breakdowns.

Payroll

- Added two options to the Deduction setup File Menu to globally update employee deductions and matches. This will allow users to always force employee deduction and match changes to all or some employees based on criteria. If criteria is blank, then all employees will be affected that use the chosen deduction or match. The change made in the "Update" section will be the set deduction or match amounts.
- Updated State 941ME and 941ME UC1 to the 2017 forms which have been approved by the state and the Federal 941 has been updated for 2017 as well.

Personal Property

- Corrected an issue where the YEAR was not displaying when printing the Trending/Cap report.
- Added an additional rounding option to the Customize screen called "Round Items Individually". This option will use the rounding option but instead of rounding the itemized totals, each item will be rounded individually.
- Corrected a problem when adding multiple accounts in Personal Property Short Maintenance screen. The system was copying the prior information causing the user to have to change the data back to prior saved information.
- Updated the option to use Address 1 in the BETE application for business name. This should be utilized via one of the other choices.

Real Estate

- Added "Property Code" to Global Changes.
- Added an "I" indicator to the Account Maintenance screen to indicate if the account has an Interested Party attached to it.
- Corrected an error occurring when running mailing labels for a range.
- Picture descriptions will now save correctly in Account Maintenance.
- Fixed an error occurring when running a database extract with certain criteria.

Tax Billing

- Added address 3 line to outprint, database extract, commitment book and laser bill formats.
- Fixed an error when running a custom billing report.
- Fixed an issue in the Supplemental process causing the supplementals to use the commitment rate key instead of the supplemental one.
- Added an optional "Past Due" field to the end of the outprint file and format. This option can be selected at the time the outprint file is created.

Utility Billing

- Added options to the comments report to search by account or date range.
- Broke out location number from the location name on the search screen to allow for easier and more accurate sorting functionality.
- Corrected Lien Discharges to print Town Name correctly on the signature line when printing saved notices.
- Fixed an issue with Utility negative balance status list showing only certain 0 balance liens.
- Updated verbiage on the Disconnect Notices per the PUC.
- Added an option to Customize (Under Bill Options) to Include Meter Change Out Consumption when using the Outprinting File Bill type. Three fields (Meter 1, 2 and 3 Change out) were added to the Outprint file and are now included in the Outprint format.

Note - Other modules may have been updated to the latest versions but have not had any noteworthy changes.
